Proclamation of citizens and civil organizations:

We declare London a liberated area, liberated in relation to corona nonsense. We strictly follow government regulations in case the government provides an understandable explanation as to why they are necessary, and verifiable evidence of necessity based on **truth**, based on **verifiable facts**.

If real evidence is not provided, then we are not following the rules from above.

**Corona sense yeah! Corona nonsense nooo!**

Together and with support of TT-technology we get the deepstate-criminals in the government under control, these sick people with an invisible sick brain corner but looking normal, people criminal by disease.
